Assumptions Used in Arriving at Fiscal Estimate

The obligation to mark the route would be accomplished consistent with traffic sign standards adopted under Wisconsin law. One sign will be placed on the right-of-way in each direction of travel directing travelers to an off-road marker along the route. The two signs on the right-of-way are type II (4'x6' plywood on a wood post). Each Type II sign, post, installation, and fleet/auxiliary equipment charges are \$350 per installed sign. The off-road marker is \$1500 installed. Assume an acceptable public location for the marker could be found at no cost to the department (with adequate parking and no new maintenance obligation). Therefore:

84.1034 2 signs on the right-of-way with installation are \$700 and the marker (including installation) in an existing public space (wayside, public park, or other public area) is \$1500.

Total initial cost is therefore \$2200. Typically, there is a 10% overhead cost per year to deal with signs on the right-of-way that are knocked down, vandalized, or damaged by weather. This would also include administrative costs to deal with the signs. Assuming a 3% inflation rate for construction/maintenance, these costs for the two signs on the right-of-way would be \$60 by the end of the first year to \$142 in the tenth year. The total overhead cost summed for all ten years would be \$956. The marker in the rest area is more durable and does not have annual maintenance costs associated with it. This then is an estimate of the maintenance contributions needed for the signs. The signs and markers would be removed at the end of their useful life unless contributed funds are available to replace them. Costs could be significantly higher, requiring greater contributions, if an adequate location is not available.

Long-Range Fiscal Implications

With normal wear, signs must be replaced every 10 years. If it is assumed that the inflation rate for construction/maintenance averages 3% per year, the cost to replace the two signs on the right-of-way at that time will be \$940.74. The marker in the rest area is more durable and is unlikely to need to be replaced after 10 years. The assumption is that contributions would be required in order for signs to be maintained. In addition, if this naming of highways and bridges encourages legislation without private funding, the cost implications would go far beyond this long-range estimate.
